Bringing Doors to Life!

Summit Automation provides the best door and window automation systems in the world with exceptional Customer care.

## LIFT-N-SLIDE AUTOMATION

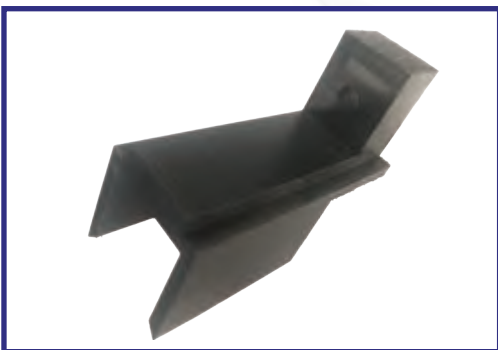

### MINI PULLEY

The Mini Pulley is the smallest pulley that we offer. It was designed to accommodate for the minimal head track clearance that is often associated with many Lift-n-Slide doors. This pulley along with our 3/8" drive belt makes a perfect pairing to make sure that no door gets left behind.

### VERTICAL BELT CLAMP

The Vertical Belt Clamp is the perfect substitute for our standard belt connection assembly (aka the "Turnbuckle"). The VBC gets the job done by mounting up against the back of the lead panel when there is no room in the header for the Turnbuckle, making it the 6th man factor on our roster of hardware.

### LIFT-N-SLIDE BRACKET

The Lift-n-Slide bracket was created to offset the rear door guide allowing for the mini pulley to be positioned above the panel. By offsetting the bracket, this allows the door to stack up against the back jamb.

No other company can compare to the quality, reliability, and Customer care of Summit Automation.
