# Summit Automation Warranty

The Limited Warranty applies to only physical goods purchased from Summit Automation or Summit Automation authorized re-sellers. This warranty is valid for one (1) year either from the date of purchase, if warranty card is not on file with Summit Automation; or from the date of final trim if warranty card is on file with Summit Automation.

## What does this Limited Warranty cover?

This Limited Warranty covers any defects in material under its intended use during the warranty period.

Upon receipt of the returned material, Summit Automation will, at their sole discretion, repair or replace, at no charge, products or parts of a product that prove to be defective under their intended use.

In order for the Limited Warranty to be valid, our system must have been installed by a Summit Certified Installer (or else the Limited Warranty is void). Please provide the name and contact information of the original installer.

## What will we do to correct problems?

Summit Automation will either repair the product at no charge (using new or refurbished replacement parts) or replace the defective product.

## How long does the Limited Warranty coverage last?

The warranty period for physical goods purchased from Summit Automation is one (1) year either from the date of purchase, if warranty card is not on file with Summit Automation; or from the date of final trim if warranty card is on file with Summit Automation.

## What does this Limited Warranty not cover?

This Limited Warranty does not cover any of the following:

- Conditions, malfunctions, damage resulting from defects in the product, nor if the product is being used for any other purpose than its intended use and qualification
- Replacement Batteries
- Labor (contact the original installer for their labor warranty coverage)

## What do you have to do?

To obtain warranty service, first, contact either the installer or Summit Automation at (480) 500-5468, or email us at [info@summitautomation.com](mailto:info@summitautomation.com) to determine the problem and the most appropriate solution.

## Is there an Extended Warranty?

Yes, the Extended Warranty is an additional two (2) years of coverage (same terms as Limited Warranty coverage) that must be purchased on the initial purchase date of the system. The Extended Warranty does not include labor warranty. Please contact the original installer to review their labor warranty policy.

For any further questions, please contact us at (480) 500-5468, or via email at [info@summitautomation.com](mailto:info@summitautomation.com)
