

Customer Success Story

SUMMIT
AUTOMATION

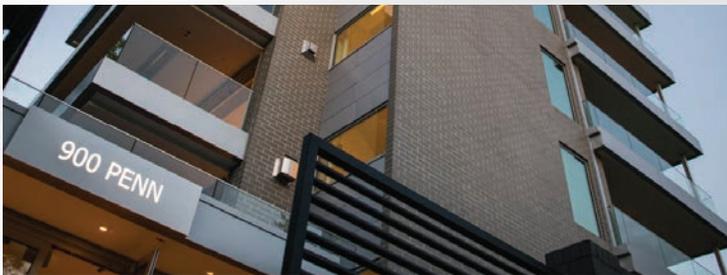

Bringing Doors to Life!

“What a pleasure it’s been to be working with this group of professionals. I have all the praise in the world for Summit Automation.”

Nadine Lange

900 PENN

900 Pennsylvania Street (also called 900 Penn) is considered Denver, Colorado’s “most coveted address”. Located in the city’s Governor’s Park neighborhood, these mid-rise luxury condos have also received the 2019 Mayor’s Design Award. This award is given to exceptional buildings that have been carefully designed to motivate and inspire the community to further improve their neighborhood and city.

In 2015, when Nadine Lange began converting the seven-story building into seven high-end condos and her own penthouse, she utilized door and window automation. At the time, very few companies had motors to automate large glass doors, so Panda Doors recommended a company to work with that could help install and program their doors with a motor. Before the improvements began, Nadine actually visited this company’s facility to assess whether they could accomplish what she wanted. After all the work was completed though, the motors were not operating at

top performance, leaving Nadine and her neighbors very unhappy.

The property management company Nadine employed to manage the building got involved in an attempt to fix the situation by contacting the motor company. That business had since been sold and renamed ‘Summit Automation’. Nadine said, “Summit made a commitment to come and fix everybody’s windows and doors.” The owner of Summit Automation oversaw the entire process, from identifying all the motors that needed tuning to the work being performed, to ensure Nadine was more than satisfied. She attests, “In the last 90 days, Summit has fixed all of the motors in every unit of my building and solved every issue, likely at their own expense.”

All of the residents at 900 Penn are pleased, especially Nadine, who feels Summit has made good on everything the other company did not do, and shared, “What a pleasure it’s been to be working with this group of professionals. I have all the praise in the world for Summit Automation.” Nadine has recently bought a place in Palm Desert, CA and has no doubt which company she will choose to do her automation, concluding, “Summit Automation was so efficient, why would I go anywhere different?”
