

SUMMIT AUTOMATION

Bringing Doors to Life!

Summit Automation provides the best door and window automation systems in the world with exceptional Customer care.

CONTROL OPTIONS

FLEXIBLE ADJUSTABLE SPEED TECHNOLOGY (FAST/+)

Our much-anticipated latest software that allows all of our motor systems to enjoy a quick open feature thanks to our variable speed technology (VST) solution and allows for the motor to slow down as it picks up the next panel for a smooth but quick opening. In case you didn't know, all motors have the variable speed technology capability, however, it takes an expert to utilize this feature without causing harm to doors, homes, or persons. Summit is the UL 325 certified door automation system supplier in North America and is ETL Listed.

SUMMIT DOOR CONTROLLER APP

The Bluetooth Chip mounted on the motor accepts commands from our Summit Door Controller app (on Google Play and IOS App store) and can control multiple automation systems using your smartphone or tablet.

9-IN-1 TOUCHSCREEN

- 2.5" wide by 3.5" high
- 90% LED Glass
- Speed Controls
- Timer Functions
- Custom Backlight
- Security Enabled
- Camo Mode (Hidden)
- Proximity Sensor

VOICE COMMAND MODULE (VCM)

The Voice Command Module (VCM) allows users to program and operate their automated doors by simply speaking to their Google Home, Alexa, ECHO, ECHO DOT devices while creating routines to enjoy your door systems to the fullest:

- Requires download of device APP (Google Home, Alexa)
- 1 VCM per motor
- Connects to the Home Automation Port on Summit Automation Control Box
- Programming instructions are provided, and programming assistance is available via Summit

WALL SWITCH KITS

The wall switch kit comes standard with every system to open, close, stop, and unlock your doors, with only the push of a button. It can also enable and disable our self-close & auto-open as well as FAST/+ speed control features and may be 4 digit security code enabled. Wall switch kits are available in black or white and both wired and wireless options. We also just released our 6-in-1 wall switch option that provides timer functions for our features, as well as a proximity sensor for handsfree opening.

REMOTE FOB KITS

The Remote FOB gives you ultimate convenience whether you're inside or outside. With a 75-foot range, the Remote FOB gives you total system control.

WAVE MOTION SENSOR

Our Wave Motion Sensor is the perfect hands-free solution allowing you to open the door without even pressing a button. To operate your precision automated system simply wave your hand in front of the sensor and the door will automatically open with an adjustable sensitivity.

CONTROL BOX

This is the brains behind every Summit Motor, and allows us to offer features like FAST/+ or quick open by utilizing our variable speed technology (VST). At merely 7.5" x 7.5" x 4.5", it gives installers flexibility to install within the pocket or up to 100 ft away from the motor in the data/AV/mechanical closet. The control box includes standard a lithium-ion battery back-up and plugs into a dedicated 15-amp standard 110v outlet while being compatible with all major home automation systems.

HEAD TRACK MOTION SENSOR (WIRED/WIRELESS)

The Head Track Motion Sensor (T1) is an exterior motion sensor that is mounted center of the lead panel in track 2 with a customizable directional beam sensor cover. This sensor provides the end user the option of a hands-free entry, as well as a secondary safety feature.

HIDDEN FLUSH MOUNT MOTION SENSOR (WIRED/WIRELESS)

The Hidden Flush Mount Motion Sensor (H1) is an interior motion sensor that is flush mounted within the soffit with a customizable directional beam sensor cover. This sensor provides the end user the option of a hands-free entry, as well as a secondary safety feature.
